GovSense

GovSense Reporting & Dashboards
Technology That Includes an Easy-to-Use Point-and-Click Report Writer That Can Be Set Up To Produce Reports and Dashboards Quickly

Any information within GovSense can be included on a report and dashboard, resulting in less wasted time, fewer missed tasks and high engagement from your jurisdiction's users. GovSense makes users self-sufficient, enabling them to define, save, schedule, run and deliver any of these reports and dashboards at any time or at any cadence. The easy-to-use, point-and-click report writer can be set up to produce reports and dashboards quickly. Reports can be sent to any person without the need of a user license or Crystal Reports. This ad-hoc reporting can be accessed in all modules and roles. Reports can be saved as Favorites and can be refreshed at any time with real-time information and data.

Reporting & Dashboards Features: *Fast. Easy. Powerful.*

Custom Dashboards
Dashboards can be user-defined, customized and configured, giving users the information they need and use most frequently, displayed the way they need to see it.

Shareability
Dashboards can be socialized with any person you choose, based on their role, department or simply their user name. This feature also means that any other users are restricted from seeing the dashboards, giving you a very suitable tool for sharing confidential information.
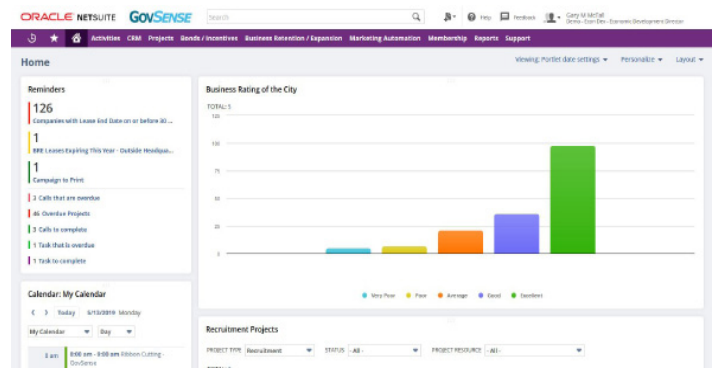

Send to Anyone
Reports can be sent to any person without the need of a user license or Crystal Reports..

Easy Access
Reports can be saved as Favorites and can be refreshed at any time with real-time information and data.

Ad-Hoc Reporting
Ad-hoc reporting can be accessed in all modules and roles

Recurring Reporting
Not only can end users define and deliver reports, but those reports can be emailed on a scheduled cadence.

Native Reporting
All of the reporting is done by end users with a ready-to-go report writer provided with the system. This will provide the jurisdiction with more extensive use of reporting capabilities to meet needs with fewer software licenses and fees.

Simple Exporting
Reports can easily be exported as CSV, PDF, Word, XML etc.

Task Tracking
Task assignments can be sent to any individual and department staff detailing allocations and completions.
