

GovSense Workflows

Technology That Makes it Easy to Streamline and Automate Workflows for Your Unique Processes

GovSense offers you the ability to easily create your own custom workflows or enjoy the system's pre-built workflows. The GovSense workflow wizard makes it easy to quickly add buttons, approvals and re-routing of information. Task assignments can be sent to individual and department staff, and completion and allocation can be tracked. Screen elements can be changed easily by dragging and dropping items to the desired positions to improve efficiency for each individual user without the need of IT or programming code. GovSense also has the ability to learn and adapt to the system work patterns of users, increasing user efficiency with streamlined processes and reduced steps.

Workflow Features

Increased Productivity

GovSense will increase productivity because it can adapt to any jurisdictional workflow quickly and easily without the need of IT or source code.

Easy To Use

Extremely easy-to-use workflow wizard that can streamline and automate processes for any jurisdiction's use case

Drag & Drop

Leveraging drag and drop functionality, users can add buttons, change approvals and re-route information to any user inside or outside of your jurisdiction.

Automation

Ensure constituents stay well informed with automated updates via email along the approval processes.

Task Tracking

Task assignments can be sent to any individual and department staff detailing allocations and completions.

Simple Templates

End users can use workflow templates as a starting point to create customized workflows to define typical or common processes according to the needs of the departments and end users.
